

# The Garden Club make Easter plant pots

The Gardening club, that is formed with Year 7 and 8 students, meet weekly on Monday lunchtimes to complete a range of gardening activities. This week saw the students create Easter plant pots of Pansies that will flower over the next couple of months.

Andrei (Year 7) puts composts in the pots for the Pansies.

These Easter pots will be sold to the school staff at £1.50 to raise money for the Easter charity appeal with Cafod.

The gardening club – formed of Year 7 and 8 – with the completed flowerpots for Easter.

Roshan plants Marigolds seeds, which are a natural deterrent for black fly who eat lettuce and broad beans.

The students have made a big contribution, not only to charity, but also to the biodiversity of the school site and growing crops to harvest in the summer term. We have now achieved Levels 1 and 2 of the Royal Horticulture Society Awards for gardening. Congratulations goes to Blessing, Dylan, Roshan, Andrei and Carys.
